Dear Sir/ Madam,

I am writing to apply for the QA analyst internship position at your company. As a fourth-year software engineering undergraduate student at SLTC Research University, I am excited about the opportunity to contribute my skills and knowledge to your team.

With a CGPA of 3.33, I have gained a solid foundation in software engineering concepts, including software Quality Assurance, software architecture, advanced software design, data technology, cloud computing, microservice, IOT, Mobile application development, and blockchain. I believe this knowledge will enable me to effectively contribute to your QA processes.

In addition to my technical skills, I possess valuable soft skills such as creativity, leadership, good communication, and critical thinking. These skills have been honed through my academic pursuits and various group projects, where I have successfully coordinated team efforts and delivered quality results.

I have also gained practical experience through projects such as developing a banking system and currency system using SOAP and REST models, as well as building a home automation system using Arduino. These experiences have enhanced my ability to test software applications thoroughly and ensure their quality.

I have enclosed my resume for your review, which provides more details about my academic achievements, projects, and technical skills.

I am eager to contribute my skills and learn from your team at your company. Thank you for considering my application. I would welcome the opportunity to discuss how I can add value to your organization. Please feel free to contact me at +94 701 182 171 or ttheruwandi@gmail.com. Thank you for your time and consideration

Sincerely,

.....
B.M.T.I.T.Herath
